Moon Beams.

by Earth Floor,
and others.

"Did you know the Moon controls time?"
"How?"
"Before the sky was fire, then the Moon started to make a day."

"Then the sky was red."

"The Moon captured more light, and then was orange."

"Yellow."

"Green."

"And today, it is blue."

"And we know, because when there is an Eclipse, we see that they are almost the same size!"

"One day the sky will be purple, and then it will be night time all day!"

2026.

The Sun by the Atmospheric Imaging Assembly of NASA's Solar Dynamics Observatory – 20100819 by NASA/SDO 084.
